

## SCA Data Retention Policy

This Data Retention Policy sets out the length of time that data will be retained by the SCA - in line with the General Data Protection Regulations (GDPR) which come into force 25th May 2018.

Different types of data are kept for different periods of time depending on the nature of the data and the need to maintain records in order to comply with legislation, requirements to report to government and other relevant authorities and the needs of the organisation to effectively administer paddlesport in Scotland.

The specific periods for which data will be kept are set out in the Appendix 1 to this policy however the general principles applied are:

- Where an individual is a member of the SCA and/or an affiliated club data will be kept for 6 years
- Where an individual has any training or qualifications the data about the individual including the training they have completed and/or qualifications they have been awarded will be kept permanently. The reason for permanent record holding in relation to awards is that the SCA, as the British Canoeing Delivery Centre in Scotland for paddlesport awards, has a duty to keep track of what qualifications have been awarded in order to be able to confirm (or otherwise) that a specific qualification has been awarded to a particular individual
- There is a legal responsibility to keep company records, (including HR records and financial records) in line with legislation currently in force
- There is a need to keep sufficient records for insurance purposes for claims that might arise. Due to the fact that those under the age of 18 have additional time in which to make an insurance claim (3 years after the point at which they reach the age of 18 under the Limitation Act 1980) records concerning incidents that could give rise to an insurance claim will be kept for the appropriate period of time.
- There is justification to keep data relating to event/competition results and winners of e.g. SCA Annual Awards as part of the record of the SCA and the organisation's heritage and development over time

Please see Appendix 1 for a full list of the data which will be stored and the relevant period of retention.

Destruction of data will take place a minimum of once per year after the periods set out in Appendix 1 have been reached.
